

# Save money with Eco Rates!

Versant Power has special rates designed for residential customers and businesses using electricity for their eco-friendly energy needs. You can save while charging your electric vehicle, powering your heat pump or heat pump water heater, or using power for energy storage solutions.

## Home Heating Eco Rate:

**Available in Bangor Hydro District and Maine Public District.**

An expanded rate is available for homes using heat pumps and/or a heat pump water heater for at least 50 percent of their heating needs. This is the same as our residential space heating service rate but now includes heat pump water heaters.

## Home Eco Time-of-Use Rate:

**Available in Bangor Hydro District and Maine Public District.**

This rate is available for whole-home electric uses, and can provide savings for electric vehicle charging and/or battery storage during periods of lower demand, primarily nights and weekends.

## Home Eco with Bonus Meter Time-of-Use Rate:

**Available in Bangor Hydro District and Maine Public District.**

This rate is available for separately metered electric uses, and can provide savings for electric vehicle charging and/or battery storage during periods of lower demand, primarily nights and weekends.

## Business Heating Eco Rate:

**Available in Bangor Hydro District and Maine Public District.**

An expanded rate is available for businesses using heat pumps and/or heat pump water heater(s) for at least 50 percent of their heating needs.

## Business Eco Rate - Separate Meter:

**Available in Bangor Hydro District.**

An expanded rate is available for businesses offering Level 2 electric vehicle charging and/or battery storage.
