

## **Pre-Application Report Request**

## Generating Facilities Greater than 500 kW

A Pre-Application Report may be requested by potential applicants developing projects 500kW in size and greater. The report provides applicants known information about system conditions at a proposed Point of Common Coupling.

Once complete, please include your \$300.00 processing fee and mail to the following address:

Versant Power
DG Interconnection & NEB Coordinator
PO Box 932
Bangor, ME 04402-0932 (Make check payable to: Versant Power)

In requesting a Pre-Application Report, a potential Applicant understands that:

- a. The existence of "Available Capacity" in no way implies that an interconnection up to this level may be completed without impacts since there are many variables studied as part of the interconnection review process.
- b. The distribution system is dynamic and subject to change.
- c. Data provided in the Pre-Application Report may become outdated and not useful at the time of submission of the complete Interconnection Request.

## a. Name: \_\_\_\_\_\_ b. Address: \_\_\_\_\_ c. City, State, Zip: \_\_\_\_\_ d. Telephone (Day): \_\_\_\_\_

f. E-Mail Address: \_\_\_\_\_

Telephone (Evening):

## 2. Proposed Point of Common Coupling

1. **Contact Information** 

The proposed Point of Common Coupling shall be defined by latitude and longitude, site map, street address,
utility equipment number (e.g., pole number), meter number, account number or some combination of the above
sufficient to clearly identify the location of the Point of Common Coupling.

<u>3.</u>	Generation Information
a.	Output Power Rating:kW or:kVA
b.	Generating Facility Type:
	<ol> <li>Single Phase Three Phase</li> <li>Synchronous Induction</li> </ol>
c.	Prime Mover: Photovoltaic Reciprocating Engine Fuel Cell Turbine
	Other (describe)
d.	Energy Source: Photovoltaic Wind Hydro Diesel Natural Gas
	Fuel Oil Reciprocating Engine Other (describe)
